PROFILE

Marine scientist with 6+ years translating complex technical content and experimental results into clear, accurate documentation. Background spans marine hardware operations, SOP development, and cross-functional collaboration with engineers and scientists. I am particularly interested in science communication and the intersection between innovative hardware solutions and sustainability.

EDUCATION

University of California, Santa Barbara – Bren School of Environmental Science Santa Barbara, CA
M.S. Environmental Science Management, Specialization: Coastal Marine Resources Sept 2021 – June 2023

University of California, San Diego – Scripps Institution of Oceanography La Jolla, CA
B.S. Marine Biology Sept 2015 – June 2019

EXPERIENCE

CSI Electrical Contractors Los Angeles, CA
Environmental Specialist 04/2025–Present

- Author and maintain procedural plans for utility-scale renewable energy sites, including dust control, traffic control, vegetation management, and spill prevention (SPCC) plans, and collaborate with field engineers on implementation.
- Translate regulatory CEQA compliance documents into clear, concise client-facing documents that summarize stormwater inspections, wildlife avoidance zones, and project status updates

Captura Corp Port of Los Angeles, CA
Marine Scientist 09/2023–04/2025

- Led weekly small boat operations; deployed and recovered ADCPs, ROVs, and CTDs
- Wrote SOPs for instrument calibration, data collection, and equipment maintenance; managed calibration schedules
- Managed procurement and inventory for all lab and field supplies — PPE, standard solutions, and instrumentation
- Sourced live specimens for lab testing: Mediterranean mussels and microalgae cultures (*Tetraselmis*, *Isochrysis*).
- Planned experimental lethality studies and coordinated organism testing schedules with third-party subcontractors

Sofar Ocean Technologies San Francisco, CA
Coastal Studies Intern 06/2022–05/2023

- Conducted offshore mooring operations in SF Bay deploying and testing remote sensing buoys
- Coordinated international recovery logistics for oceanographic buoys; documented failure-analysis & repairs
- Wrote SOPs for customers to assemble, deploy, and operate buoys with guidance on troubleshooting and maintenance

National Park Service Marin County CA
Fisheries Technician 08/2020–08/2021

- Monitored endangered Coho salmon and steelhead trout populations via in-creek surveys, electrofishing, and PIT tagging; tagged and monitored 450+ fish for recruitment and habitat data

City of San Diego San Diego, CA
Marine Biology & Oceanographic Operations Intern 10/2017–10/2018

- Executed at-sea fieldwork; operated and calibrated marine sensing equipment (ROV, CTD profilers); collected and analyzed water samples, fish, and invertebrates for regional water health assessment.

SKILLS

Documentation & Communication: SOP development, technical procedure writing, process documentation

Marine Technology: ROV deployment & recovery, CTD/ADCP operations, small boat field work, marine equipment calibration & maintenance

Task Management: Project coordination, cross-functional team collaboration, Asana, HubSpot, Excel
